

CRPA SHARE

2017 update

Leah Shuparski-Miller MSc CHP
Director of Professional Development, CRPA

Goals

Foster discussion about CRPA SHARE

Elicit ideas for improvement

Outline

Reminder: what is CRPA SHARE?

How to report an event

Comparison of CRPA SHARE data with CNSC 2015 Regulatory Oversight Report

Why is incident reporting and learning important?

The Radiation Safety community as a whole can benefit from hearing about incidents and near misses in other facilities

Helps us try to not make the same mistake twice

Gives the radiation safety community credibility: shows we are serious about learning from mistakes

Many of us already rely on peer network to learn of incidents and near-misses: a formalized system gives us more reach, and allows the CRPA to trend incidents

CRPA Stakeholder Hub for Accrued Reported Events (SHARE)

Web-based form

Hosted via Google Apps for Non-Profits

Form allows the easy generation of statistics

Having all incidents in the same format helps with sharing summaries
